RE: Allred's Project - Lehi Quarry: S/049/031; and, Ekin's East Quarry: M/049/032

As we discussed this last week when I visited you in your office, my client desired to only place 4" of topsoil and to vary the reclamation seeding plan. You stated to me that you required a minimum of 12" of growth media up to 24" and that the seeding plan could be varied anytime by letter request prior to reclamation. It is my understanding that the material that you require as cover is generally what is available onsite and is not necessarily high organic grade clean topsoil that might be required on a UDOT road job. When we visited the Ekin's East site, it was my understanding that the material that was at the site was what was envisioned as growth media for the reclamation and that offsite topsoil was not to be imported. You indicated to me that the seeding plan could be varied based on an alternate proposed land use or if cheaper more suitable seed mixtures might be proposed.

Please contact me at 615-896-7375 if there are any questions regarding this matter or if I have not accurately portrayed the facts in this matter.

Sincerely,

A handwritten signature in dark ink, appearing to read "Cyrus W. Wiser, Jr." with a stylized flourish at the end.

Cyrus W. Wiser, Jr., P.E.
